

# MWU Student Immunization Checklist

Welcome! This checklist is a **guide** to assist you with providing the necessary immunization information for you to be a student at Midwestern University. Please note, while we would like this information prior to the start of classes, we do provide a one-month grace period for all incoming students.

**All original vaccine records and quantitative blood titer results must be uploaded to your student portal to fulfill your immunization requirements.**

If you have any questions, email Mr. Don Evans at [devans@midwestern.edu](mailto:devans@midwestern.edu) in the Office of Student Services or Ms. Kendra Ibrahim, MMS, PA-C, our Immunization Compliance Consultant at [kibrah@midwestern.edu](mailto:kibrah@midwestern.edu). You can also contact the Office of Student Services at (630) 515-6470.

## **Quantitative blood titer results:**

- Hepatitis B Surface Antibody
- Measles IgG titer
- Mumps IgG titer
- Rubella IgG titer
- Varicella IgG titer

## **Childhood vaccine records:**

- Proof of (3) childhood Hepatitis-B vaccines
- Proof of (2) childhood MMR vaccines (after your 1<sup>st</sup> birthday)
- Proof of (2) childhood Varicella vaccines

## **Current TDaP (Tetanus, Diphtheria, and Pertussis)**

- Within the last 10 years.
- Given after age 12.

## **Current flu vaccine**

- **This is an ANNUAL requirement**

## **Baseline (2)-step TB skin test (or Quantiferon-Gold) blood titer.**

- A (2)-step TB skin test requires 2 different TB skin tests placed within 1-3 weeks of each other. Each test must be read and documented 48-72 hours after placement by a healthcare provider.
- **This is an ANNUAL requirement.** Once you have a baseline (2)-step TB skin test or Quantiferon-Gold titer you will only need to do a (1)-step TB skin test each year – provided it is done prior to the expiration of the prior year's test.
- If you receive a positive result (from either the TB skin tests or the Quantiferon-Gold titer), you will need to obtain a chest Xray and clearance from your healthcare provider. You may not NEED annual chest Xrays – but you will need clearance of TB symptoms by your healthcare provider each year. ***This clearance must be documented on your healthcare provider's letterhead and signed by your healthcare provider.***
- **Please note: Some programs require students to have (2)-step TB skin test done each year. A Quantiferon-Gold titer suffices for that test and only require a single blood draw (as opposed to four clinic visits to complete the (2)-step TB test. If you are unsure about the requirement of your Program/College TB requirement for clinical rotations, please contact your Dean's Office.**

## **Student Health Status Form**

- Signed by your healthcare provider (DO, MD, PA, or NP).
- Found in the Student Services Tab under Forms and Information.

### **For Downers Grove students who are under the age of 21:**

- ***Proof of an adult meningococcal vaccine (Menactra or Menveo) is required. If this vaccine was given prior to your 16<sup>th</sup> birthday, you will need a booster.***
- 

## **Instructions for uploading your immunization records and your Student Health Status form:**

1. Save the document in a .pdf format. All uploads must be .pdf.
2. Go to your online MWU student portal.
3. Go to the Student Services tab.
4. Select “Documentation Upload”.
5. Select the appropriate category for the type of record you are uploading.

Note: The Student Health Status Form is located under “Forms and Information”. It needs to be printed and then completed and signed by your healthcare provider. You can then save it as a .pdf and upload to your student portal.

**All titers and booster vaccines (HepB, MMR, Varicella), as well as flu shots and TB skin testing can be completed at the MWU Multispecialty Clinics.**

### **MWU - Downers Grove Multispecialty Clinic**
